THE Indianapolis Daily News, of yesterday, as we learn by telegraph, published incryiews with leading wholesale merchants, showing that trade at present is much improved over last year and that the prospects are excellent for a largely increased and profitable fall business. THE Workingmen's movement threatens, from all that we can learn, to let down to a Radical scheme in preparation for the coming municipal election. The Hayes ring have for some days been maneuvering through its hired strikers, and unless the honest, hard-fisted laborers, who have been so heartily denounced by that ring, are very sharp, they will find themselves in toils from which they will hardly be able to extricate themselves with credit. We say this, presuming, as we have a right to, that the white workingmen of Memphis are Democrats, who would not willingly do anything that would conduce to were admitted.

The convention of chief fire engineers to be held at Nashville on the fourth proximo will be largely attended, especially by members from the northern States.

A London telegram says that, owing to the depression in the cotton trade, the Nuncaton cotton-mill, which employes over five hundred operatives, will be closed.

The very full and interesting special from Nashville which we publish this morning is another earnest of the Appeal's determination to be equal to every demand of the people.

Prof. Grole on "International scientific service," after a few remarks introductory, said the invention of printing marks the third and present epoch of general civilization, the first epoch being limited by the acquirement of articulate speech in the yet shapeless past, and the second by the production of phonetic characters at a time in the history of mankind, which archæology is enabling us to fix more and more definitely. The motor of civilization must always consist in an improvement of the machinery for the exchange of thought, for our whole sist in an improvement of the machinery for the exchange of thought, for our whole progress in this direction is the working of a comparative civilization, and in this view the terms savagary, barbarism, might well fall away as having been misused and being liable to misuse, and expressing different values at different times with different people. With this classification of the growth of the human intellect to guide us, and with the recognition. intellect to guide us, and with the recogni-tion of the fact that we are gradually coming into closer contact with other people all over the globe through our intellectual enterprise, the time seems near at hand when, by an international scientific organization the efforts of the best scientific munds of the more civilized nations may be

organization the efforts of the best scientific minds of the more civilized nations may be joined for the solution of these problems which all are alike forced to grapple with and which to themselves constitute the sufficient proof of a larger kinship than is expressed by the political boundaries of the globe.

The professor discussed the existing organizations and the benefits we have derived from them. Those of Europe and America are performing excellent work, but there are other questions to the answering of which their means are inadequate, foremost among which is that of the origin of our species; its elucidation must be sought for in regions outside of those inhabited by the more civilized nations. The professor here referred to a paper on the peoprofessor here referred to a paper on the peo-pling of America, read before the Buffalo society of natural science, in February, and reprinted in the American Naturalist, for April, 1877. THE CHICAGO BANK

Failure-The Poor People who Confided

their Earnings to it Liable to Lose Sixty-Six and Two-Thirds Cents on Every Dollar. The President, the Cashler and the As-

sistant-Cashier Absconded - Examination by Assignee Taylor Possibly by Robbery.

CHICAGO, August 29.—There has been no demonstration on any of the banks this morning beyond a somewhat larger propor tion of depositors than usual who are draw tion of depositors than usual who are drawing out their accounts from the savings institutions. There is a large crowd about the State bank, but the doors are closed and guarded by a small detachment of police. The last report of the bank, made on July 1st, is as follows: Mortgage loans on real estate, \$1,507,013; loans on collaterals, \$1,565,053; United States bonds, \$510,000; South park bonds, \$208,000; county and school bonds, \$10,500; cash and exchange, \$285,429, benking house and deposit yaults \$285,429; banking house and deposit vaults \$319,332; safes and fixtures, \$10,000; total that during July and August the liabilities were reduced \$1,427,000, and the resources \$1,690,000. It is alleged that since the July run began, about nine hundred thousand dollars has been paid out, and that the available assets have all been converted into cash, and for the past few weeks vigorous efforts have been making to raise enough money among the bankers here to tide over affairs. On Saturday President Spencer left affairs. On Saturday President Spencer left for New York for the alleged purpose of raising three hundred thousand dollars. Nothing has been heard from him since that time. Just before going, previous to the close of business Saturday, an assignment had been drawn up, to be used in case nothing was heard from Spencer by three o'clock yesterday. Promptly at that hour the papers were turned over to Colonel Abner Taylor, who is now in full possession. The bank has under its more recent management made some reckless investments, and lost heavily by them and by the decline in suburban real estate. The papers print the record of D. D. Spencer this morning, and make a bad show-Spencer this morning, and make a bad show-ing for that gentleman. It is estimated by some that the depositors will realize about thirty-three per cent., but on this point nothing definite can be learned until the assignee reports.

At half past one there has been no demonstration of any kind, and there is now no probabibility of any disturbance at these banks. The Fidelity, which opened two

hours earlier than usual, has been paying fifteen per cent. to all depositors who present their books, but enforces the time rule as to \$47,677; bills payable, \$52,050; total, \$3,-036,017. The more sanguine claim that at least 80 per cent, of the deposits will in time be repaid. Interviews with leading banking men indicate that they fear more for the effect outside of the city, where the failure was not anticipated, than here where it has long been looked for. Besides the president of the State savings bank, the cashier and assistant-cashier are said to have left town. None of the officers have visited the institution during the day. have visited the institution during the day. The examination of securities has not yet progressed very far, and the reports as to the character of those already scrutinized are current.
